Company Introduction

MBMalik Technologies Pvt Ltd is a growing technology company built on trust, innovation, and professional service delivery. We help businesses adopt modern IT solutions that improve operations, strengthen digital presence, and support long-term growth.

Who We Are

A client-focused IT solutions company serving businesses, startups, and institutions.

What We Do

Software, web, mobile, cloud, infrastructure, automation, and support services.

Our Approach

We understand business goals first, then design practical, customized solutions.

Our Tagline & Brand Identity

Your Trusted IT Partner

Our tagline defines who we are: a dependable technology partner committed to professional advice, reliable delivery, and long-term support.

Business-First Thinking

We understand business needs before recommending solutions.

Honest Guidance

We communicate clearly and provide practical technology advice.

Long-Term Commitment

We support clients beyond project delivery.

Vision & Mission

Vision

To become a respected and trusted IT solutions company known for delivering reliable, scalable, and business-focused technology services.

Mission

To empower businesses with practical IT solutions that solve real problems, improve efficiency, and create measurable value.

Our Goal

Supporting sustainable business growth through innovation, security, and professional delivery.

Core Corporate Values

Trust

The foundation of every successful business relationship.

Professionalism

A structured and respectful approach to delivery and support.

Quality

Reliable, secure, and user-friendly technology solutions.

Commitment

Dedicated to client success from start to finish.

Innovation

Using modern ideas and technologies to create value.

Partnership

Building long-term relationships based on trust and performance.

Why Choose MBMalik Technologies

We combine business understanding, technical capability, and reliable support to deliver long-term value.

Business-First Approach

We understand requirements before proposing solutions.

End-to-End Services

Multiple technology solutions under one professional roof.

Reliable Support

Post-project assistance that protects long-term value.

Trust & Professionalism

Clear communication, responsible delivery, and dependable service.

Comprehensive IT Solutions

Integrated capabilities to support business growth and digital transformation.

Solutions**

Custom Software Development

We build bespoke software solutions designed around exact business requirements, workflows, and operational goals.

Solutions We Develop

- Inventory Management Systems
- CRM & Customer Management
- Order Tracking & Reporting
- Admin Dashboards & Portals
- Workflow Management Systems
- Custom ERP-Style Modules

Business Benefits

- Reduced manual workload
- Improved accuracy and control
- Better visibility and reporting
- Faster decision-making

Website Design & Development

Creating professional digital experiences for modern businesses.

Corporate Websites

Professional web presence for modern brands.

E-Commerce Platforms

Scalable online stores and product experiences.

Custom Portals

Business-focused web platforms and dashboards.

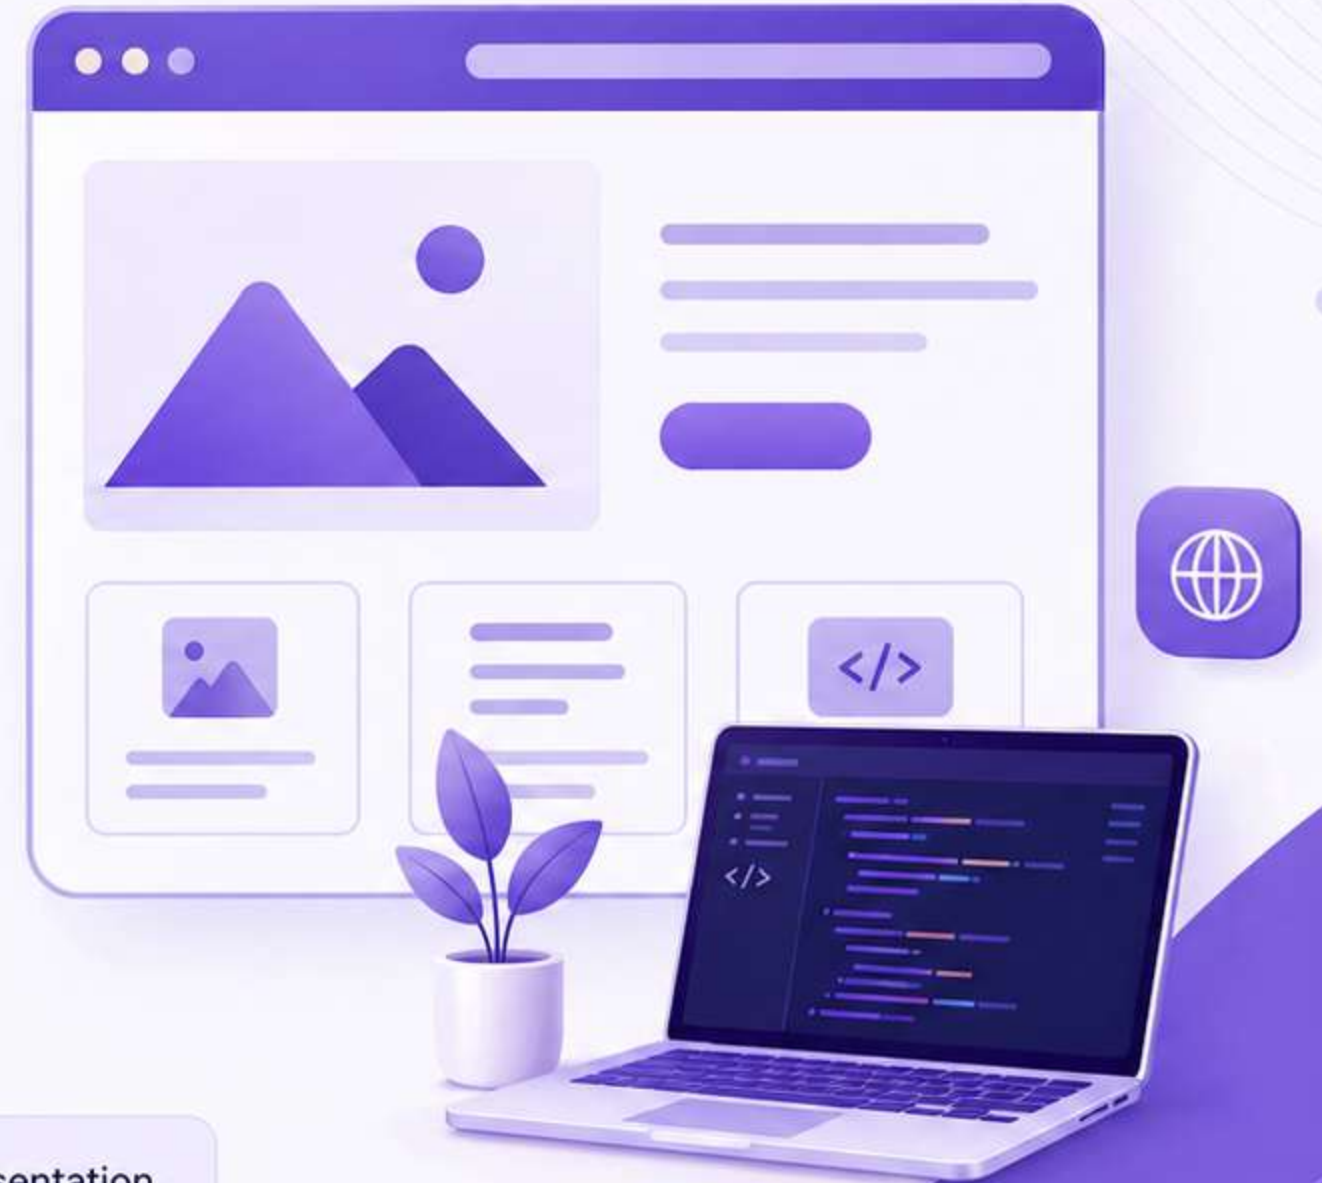

Redesign & Maintenance

Continuous improvement, support, and optimization.

Our focus is clean design, mobile responsiveness, fast performance, and strong brand presentation.

Mobile App Development

Scalable mobile solutions for Android and iOS platforms.

Customer Apps

Enhance engagement and service accessibility.

Business Apps

Support internal workflows and field operations.

Booking & Delivery Apps

Streamline service-based mobile experiences.

API & Dashboard Integration

Connected mobile systems with cloud-based management.

Our mobile solutions help businesses strengthen digital presence, improve convenience, and support growth.

Desktop Application Development

Stable software solutions for office operations and local hardware workflows.

Billing & POS Systems

Reliable desktop tools for billing, sales, and cash counter operations.

Offline-Capable Software

Operate efficiently even in low-connectivity or local network environments.

Printer & Scanner Integration

High-speed support for barcode scanners, receipt printers, and local devices.

Office Data Management

Structured desktop systems for records, reporting, and day-to-day control.

Our desktop applications are designed for speed, accuracy, and dependable local performance.

Cloud Solutions

Secure, scalable cloud services that improve access, resilience, and operational flexibility.

Server Migration

Move critical workloads to modern cloud-ready environments.

Application Hosting

Deploy business applications for secure access from anywhere.

Automated Backup

Protect important data with reliable backup and recovery workflows.

Scalable Infrastructure

Reduce hardware dependency and plan for long-term growth.

IT Consulting & Advisory

Professional guidance to help businesses plan, optimize, and scale technology decisions with confidence.

Technology Planning

Strategic advice aligned with budget, operational goals, and future growth.

Infrastructure Assessment

Evaluate current systems and identify practical improvement opportunities.

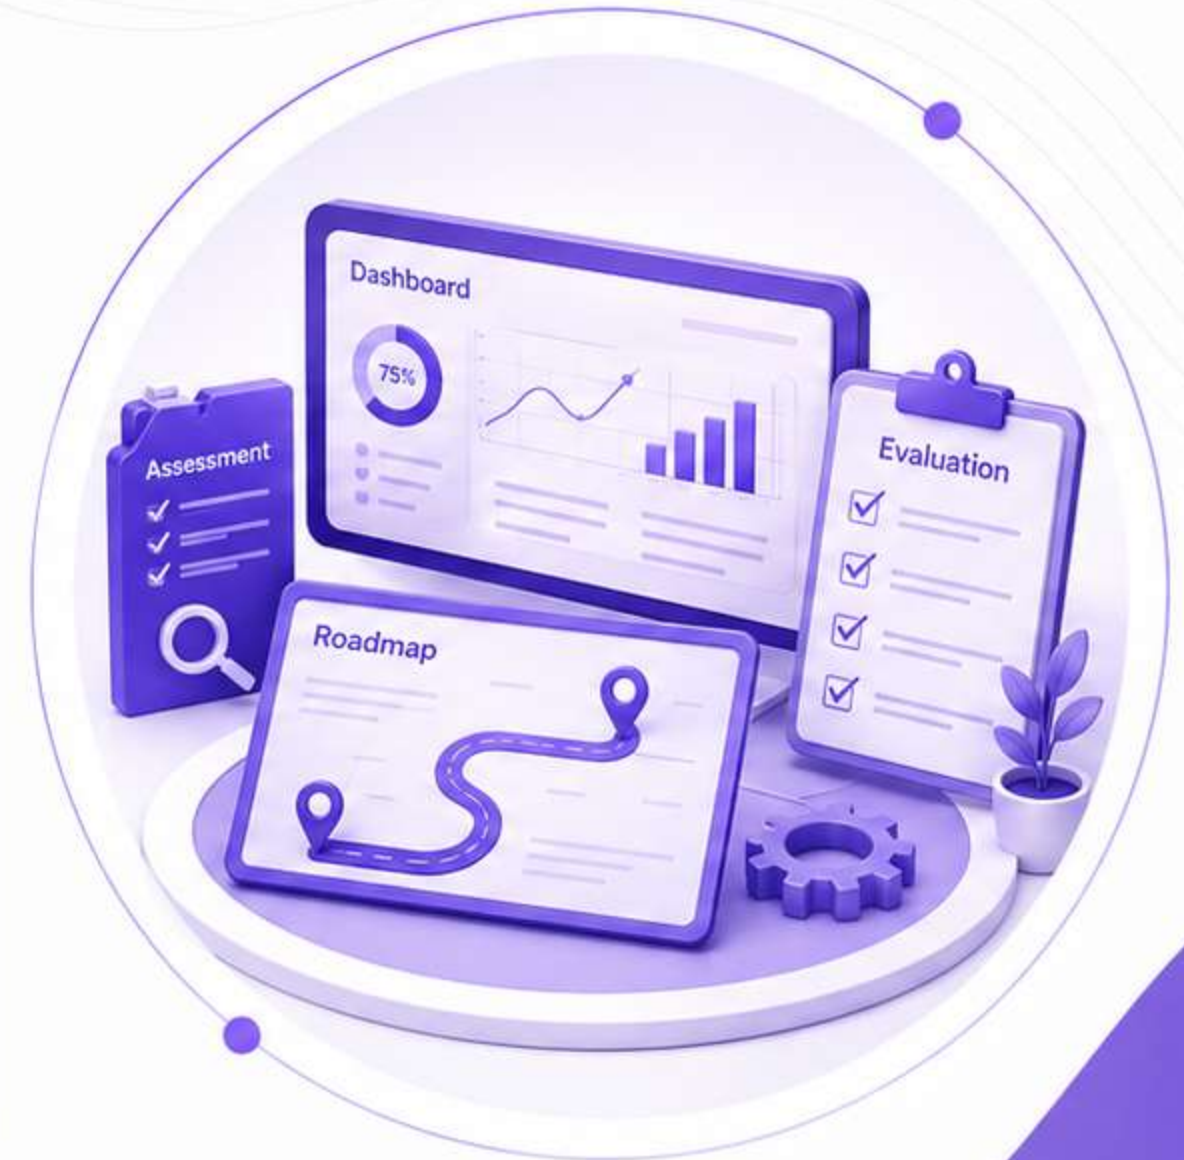

Security Guidance

Support for risk awareness, policy planning, and reliable IT practices.

Vendor Evaluation

Independent recommendations to help choose the right tools and services.

We provide clear, honest recommendations that focus on business value.

Business Automation

Turning repetitive manual work into efficient digital workflows.

Automatic Reporting

Reduce repetitive reporting tasks and improve information flow.

Lead Management

Capture, organize, and follow business opportunities efficiently.

Invoice Generation

Automate billing workflows for speed, consistency, and accuracy.

Process Optimization

Design smarter workflows that cut delays and reduce errors.

Automation helps businesses improve productivity, accuracy, and response time.

PBX Communication Systems

Professional call-management solutions for better internal coordination and customer communication.

IP PBX Setup

Configure reliable calling infrastructure for office communication.

Call Routing

Direct calls efficiently to the right department or extension.

Call Recording & Voicemail

Improve service quality with organized call history and message access.

Extension Management

Structured communication for teams, branches, and departments.

Professional communication systems improve responsiveness and business image.

IP Exchange Systems

Centralized voice infrastructure for efficient communication across branches and teams.

Centralized Call Handling

Manage inbound and outbound calls through one coordinated platform.

Multi-Branch Connectivity

Link branches and departments with structured voice communication.

Call Center Readiness

Ideal for service teams that require organized, scalable call flows.

Cost-Effective Operations

Improve connectivity while reducing communication complexity.

Mobile Device Management

Centralized control and security for company-owned smartphones, tablets, and mobile endpoints.

Device Enrollment

Organize and register company devices in one controlled environment.

Policy Enforcement

Apply security settings and usage standards across devices.

Remote Configuration

Update, manage, and support devices without physical handling.

Data Protection

Help safeguard business information and reduce compliance risk.

MDM strengthens security, control, and consistency across mobile operations.

CCTV & Security Infrastructure

Modern surveillance solutions to protect facilities, staff, and business assets.

Site Survey & Planning

Assess spaces and design camera placement for effective coverage.

DVR / NVR Setup

Configure dependable recording and monitoring infrastructure.

Remote Viewing

Access camera feeds and oversight tools from connected devices.

Asset Protection

Strengthen operational safety through modern surveillance technology.

Comprehensive surveillance improves visibility, protection, and operational confidence.

Solar System Installation

Practical energy solutions for homes and small businesses seeking lower electricity costs and stronger energy independence.

Load Assessment

Evaluate energy requirements before system planning and installation.

Panel Selection

Choose suitable solar components for reliable long-term performance.

Backup Planning

Design systems with backup support for greater continuity and resilience.

Energy Savings

Reduce utility costs while supporting sustainable power usage.

We help clients plan efficient solar systems with practical, business-focused advice.

Our Working Process

A clear delivery framework from requirement discussion to successful deployment.

1

Requirement Discussion & Analysis

We understand business needs, objectives, and challenges before solution design.

2

Design, Architecture & Development

We translate requirements into structured design, build, and implementation.

3

Testing, Deployment & User Training

We verify quality, launch confidently, and support users with guidance and handover.

Structured execution helps ensure quality, clarity, and long-term success.

Technology Capabilities

Modern tools and practical architectures that support scalable, secure, and business-focused solutions.

Frontend & UI

React, Angular, responsive UI frameworks, HTML5, CSS3.

Backend & APIs

Node.js, PHP, .NET, RESTful APIs, custom integrations.

Databases

MySQL, SQL Server, PostgreSQL, structured data design.

Deployment & Integration

Cloud deployment, third-party integrations, scalable architecture.

We build reliable technology stacks that align with operational needs and future growth.

Industries We Serve

We support organizations across multiple sectors with tailored digital, communication, and infrastructure solutions.

Healthcare & Pharma

Patient support systems, websites, apps, and secure digital workflows.

Retail & Trading

CRM, POS-connected dashboards, business automation, and communication systems.

Education & NGOs

Operational tools, collaboration systems, and digital engagement platforms.

Corporate & Multi-Branch Businesses

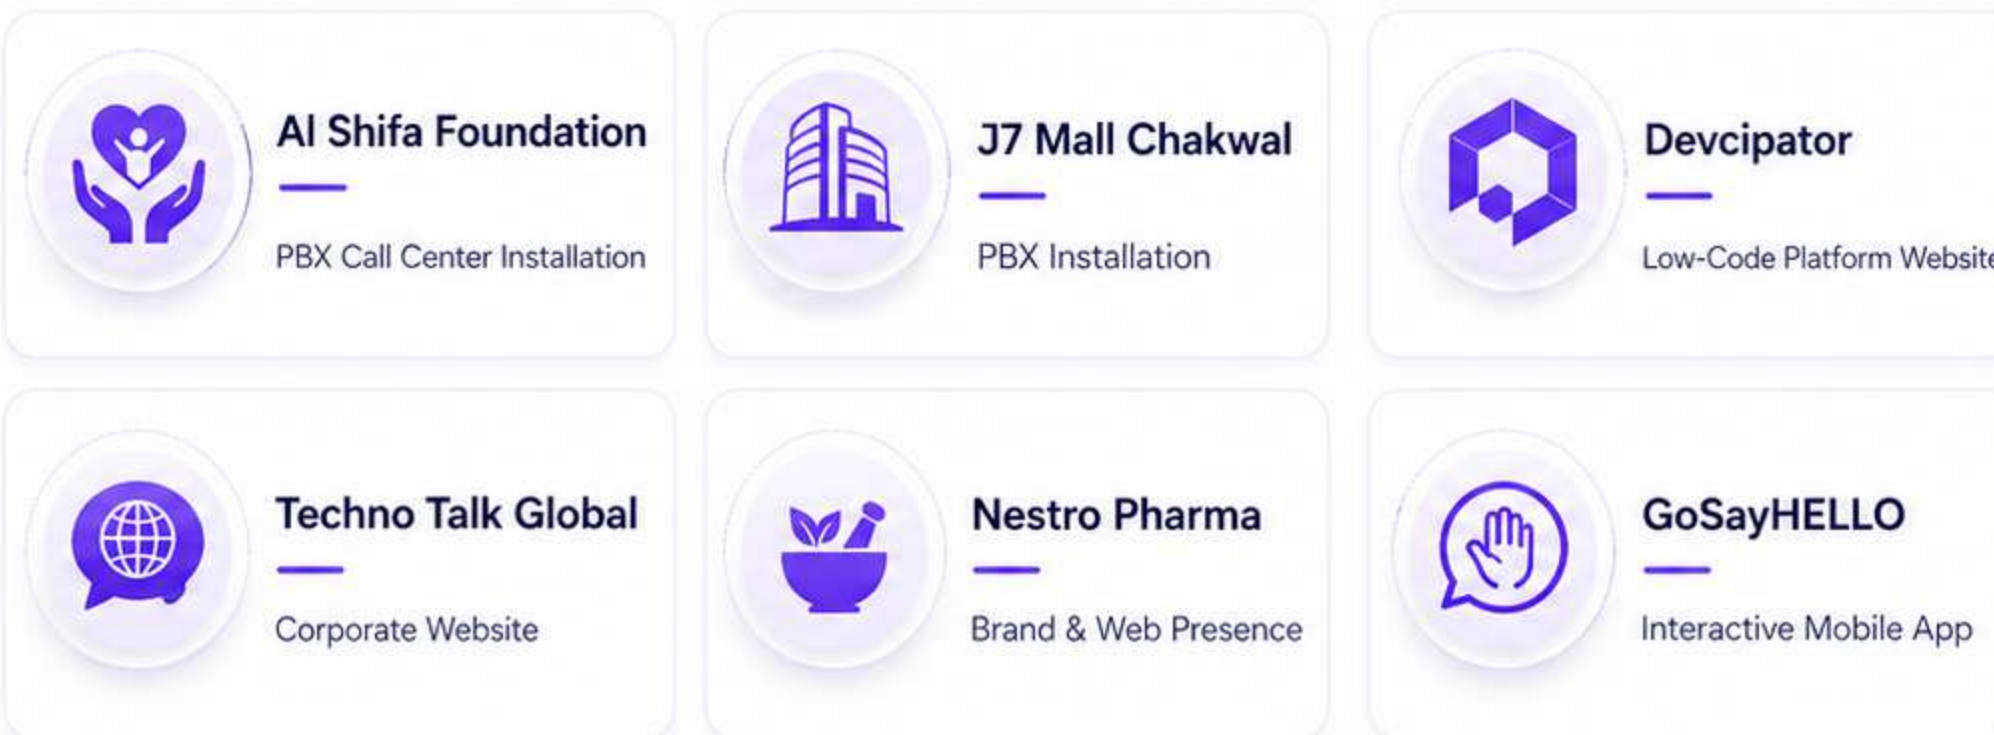

PBX, IP exchange, security infrastructure, and scalable software solutions.

Our strength is adapting technology to the unique workflow of each industry.

Selected Clients & Collaborations

A growing portfolio of organizations, projects, and business relationships across multiple sectors.

Every engagement reflects our commitment to practical delivery, professional standards, and long-term trust.

Project Portfolio Snapshot

A cross-section of the solution areas we design, deliver, and support.

Custom Software Platforms

Scalable, secure, and tailored platforms built for your business.

Corporate Websites & Portals

Modern, responsive, and high-performance web experiences.

Mobile Applications

Intuitive and robust mobile apps for iOS and Android.

PBX & IP Exchange Systems

Reliable communication systems for seamless connectivity.

CCTV & Security Infrastructure

Intelligent surveillance and secure infrastructure solutions.

Solar & Energy Solutions

Sustainable energy systems for homes and businesses.

Our portfolio combines software innovation with real-world operational infrastructure.

Featured Project: CRM Dashboard

A business management platform designed to centralize operations, reduce manual work, and improve decision-making for SMEs.

Customer & Sales Tracking

Manage customers, interactions, and sales history in one place.

Inventory & POS Visibility

Monitor stock movement and operational activity in real time.

Invoices & Quotations

Generate professional billing documents quickly and consistently.

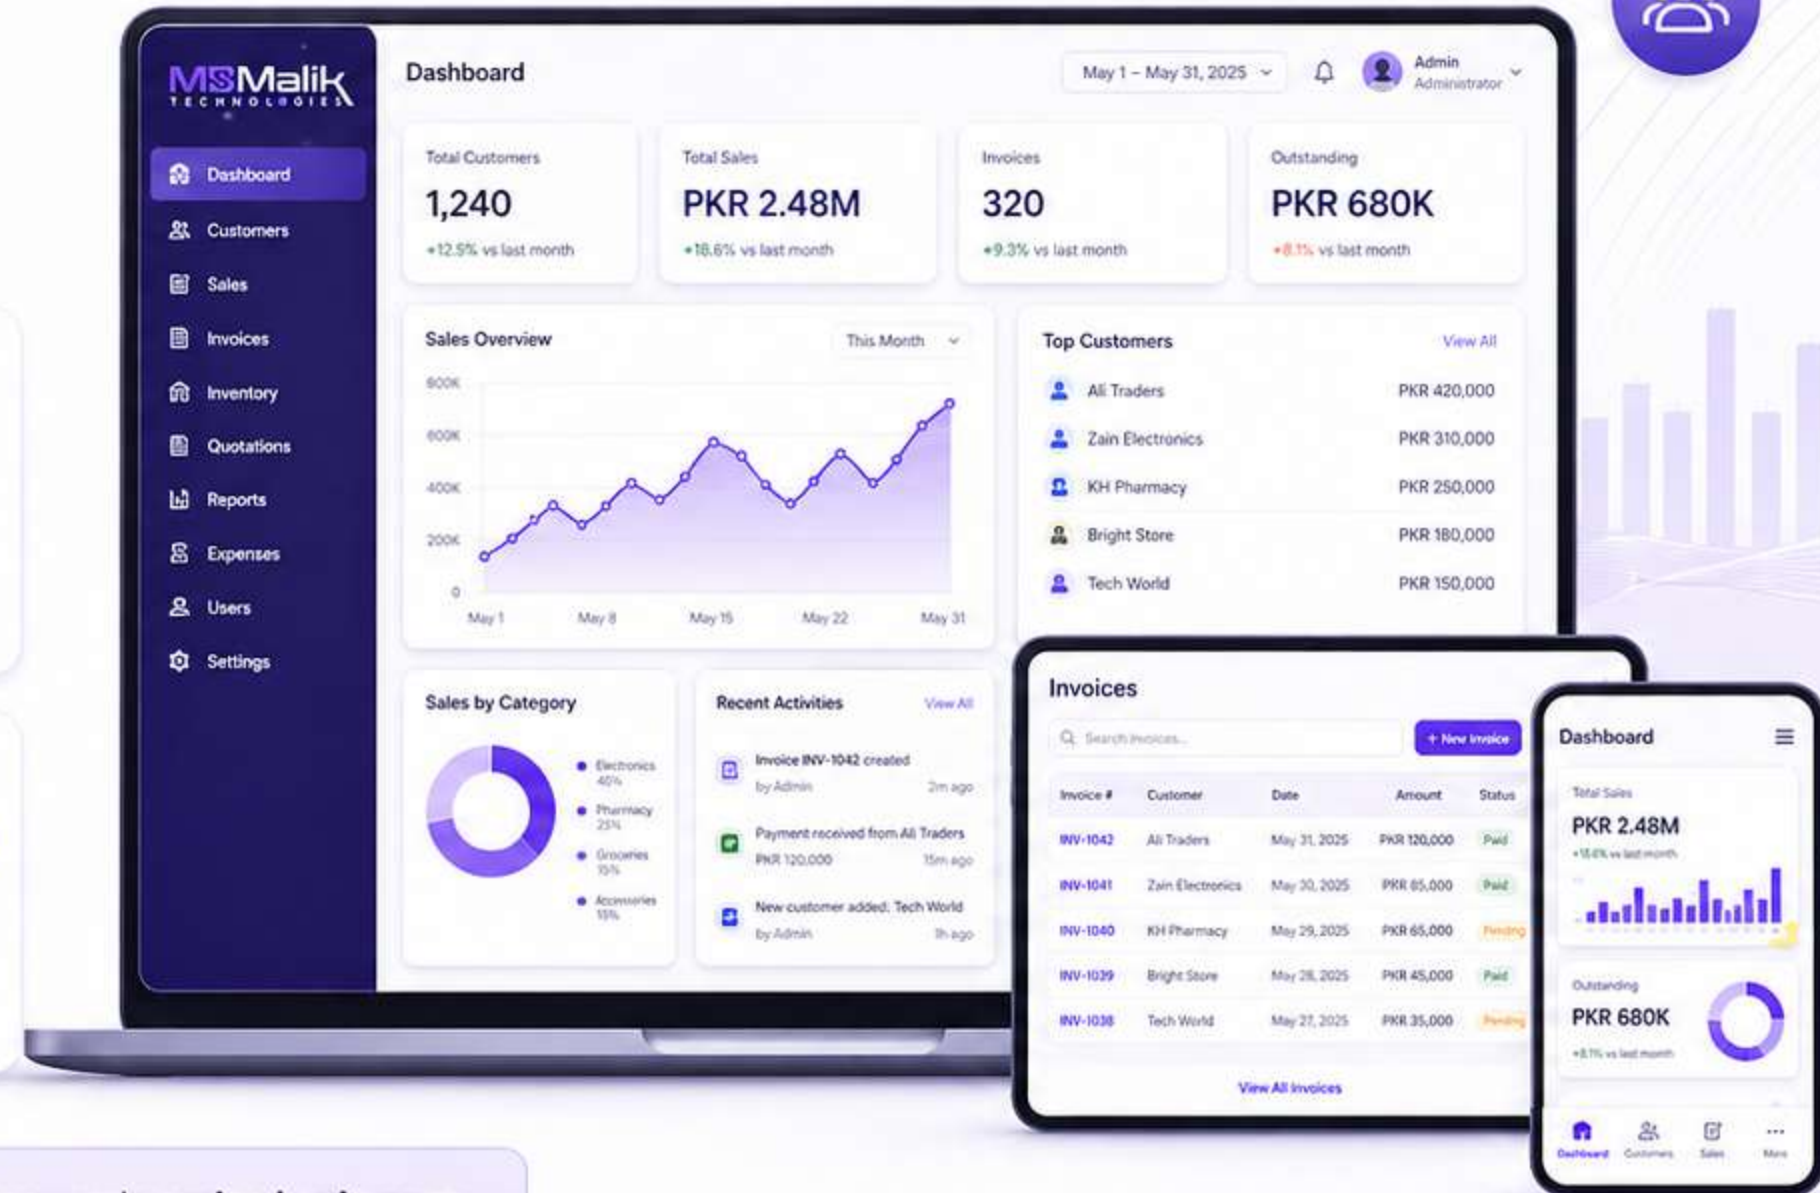

Reports & Multi-Device Access

Access insights from desktop, tablet, or mobile with better visibility.

Suitable for **retail stores, pharmacies, restaurants, electronics shops, and service businesses.**

CRM Dashboard helps growing businesses simplify operations and scale with confidence.

Healthcare & Patient Support Solutions

Technology solutions designed to improve communication, service access, and trust in healthcare environments.

Al Shifa Foundation PBX Call Center Installation

- ✓ Deployed a custom PBX-based call center system.
- ✓ Improved patient support communication and call routing.
- ✓ Enhanced responsiveness for service teams.

Dr. iQ Digital Healthcare App

- ✓ Patient-centered mobile experience.
- ✓ Focused on convenience, accessibility, and trust.
- ✓ Supported a modern healthcare engagement model.

Reliable healthcare technology improves communication, access, and service quality.

Communication & Infrastructure Projects

Professional deployments that improve coordination, visibility, and operational reliability.

J7 Mall Chakwal PBX Installation

Implemented a scalable PBX setup to improve internal communication across departments.

Al Shifa Foundation PBX Call Center

Built a communication environment to support patient service operations.

CCTV & Security Deployments

Surveillance planning, recording infrastructure, and remote viewing capability.

IP Exchange Systems

Structured multi-branch voice infrastructure for offices and service operations.

Infrastructure projects are delivered with a focus on practical usage, continuity, and business value.

Quality, Security & Reliability

Professional delivery standards that help clients trust the systems we build and support.

- 1 Thorough Testing**
Rigorous review before deployment to improve stability and usability.
- 2 Secure Deployment**
SSL setup, protected environments, and security-first implementation practices.
- 3 Access & Data Protection**
Role-based access, controlled permissions, and responsible data handling.
- 4 Ongoing Support**
Post-project maintenance, updates, and responsive technical assistance.

Reliable solutions are built through disciplined testing, secure architecture, and dependable support.

Partnership & Collaboration

We welcome long-term relationships that create mutual value, delivery strength, and strategic growth.

White-Label Development Support

Reliable delivery support for agencies and partner organizations.

Strategic Technology Partnerships

Joint collaboration for software, cloud, and communication solutions.

Long-Term Support Agreements

Ongoing technical care, maintenance, and optimization.

Project-Based Collaboration

Flexible engagement models for startups, growing businesses, and institutions.

We believe strong partnerships are built on trust, communication, and consistent delivery.

Let's Build the Future Together

Your Trusted IT Partner

Thank you for your time and consideration. We welcome opportunities for projects, partnerships, and long-term collaboration.
